

Post-Tissue Biopsy Care Instructions

切除、切片手術後注意事項

1. On the day when you return home, please rest as much as possible.
2. If there is significant bleeding from the wound after returning home, please return to the hospital for a check-up.
3. After the local anesthetic wears off, you may experience occasional mild swelling around the wound. If the symptoms are severe, please return to the hospital for examination.
4. Please take the medications prescribed by the doctor on time.
5. Do not touch or rub the wound area to prevent inflammation.
6. Keep the wound dry and avoid getting it wet. If it accidentally gets wet, change the dressing immediately to prevent infection and inflammation.
7. Apply ice to the wound 4 times a day for 20 minutes each time, for 2 days.
8. Return to the hospital for follow-ups as scheduled by the doctor and for viewing the pathology report.
